PROFILE

A highly motivated software engineer with strong capabilities in building dynamic web utilities and data-driven pipelines. Experienced in structuring backend operations, writing robust automation scripts, and designing responsive front-end components. Fluent in English and dedicated to applying clean-code standards and agile methodologies in collaborative engineering teams.

TECHNICAL SKILLS

Languages:

JavaScript

Python

HTML5

CSS3

SQL

Frameworks:

Flask

React

Node.js

Tools & Methods:

Git & GitHub

Scikit-Learn

REST APIs

Agile/Scrum

WORK EXPERIENCE

Frontend Developer Intern • Tech Corp

Jan 2024 - Jun 2024 | San Francisco, CA

- Collaborated on building highly interactive, modular user interfaces utilizing modern JavaScript and React.
- Designed and integrated lightweight, customizable progress dashboards to showcase backend calculations visually.
- Optimized page loading times by refactoring layout assets and structuring clean, modular styles.

Junior Python Developer • Web Solutions

Jun 2023 - Dec 2023 | Remote

- Wrote clean, automated Python utility scripts to parse structured and unstructured PDF documentation.
- Built and tested lightweight REST API endpoints using Flask to bridge frontend operations with backend data.
- Utilized Scikit-Learn tools to design basic semantic keyword categorization programs for internal data management.

EDUCATION & LANGUAGES

Bachelor of Science in Computer Science

Graduated May 2023

State University • GPA: 3.7/4.0

Languages:

English: Fluent (Professional proficiency) • French: Conversational • Arabic: Native
