PROFESSIONAL SUMMARY

Data Engineer with over 6 years of experience specializing in the design, development, and maintenance of scalable data architectures and robust ETL/ELT pipelines. Deep expertise in the GCP and AWS ecosystems, with a strong focus on stream processing, data warehousing, and infrastructure as code. Proven ability to optimize data workflows, reduce cloud computing costs, and deliver high-quality data products that drive business intelligence.

CORE COMPETENCIES & SKILLS

Programming Languages:	Python, SQL (Advanced), Scala, Bash
Cloud Infrastructure:	GCP (BigQuery, Dataflow, Cloud Storage, Pub/Sub), AWS (S3, EMR)
Data Processing:	Apache Spark, Apache Kafka, dbt, Snowflake
Orchestration & DevOps:	Apache Airflow, Docker, Kubernetes, Terraform, GitHub Actions
Databases:	PostgreSQL, Redis, MongoDB

PROFESSIONAL EXPERIENCE

Senior Data Engineer

Nexus Analytics

Montreal, QC
Jan 2023 – Present

- Spearheaded the migration of legacy daily batch pipelines to real-time streaming architectures using **Apache Kafka** and **Spark Structured Streaming**, reducing data latency from 24 hours to sub-minute intervals.
- Architected and deployed a centralized data warehouse in **Google BigQuery**, managing over 500 TB of data and serving 100+ concurrent business users.
- Optimized existing SQL transformations via **dbt**, which improved data quality checks and reduced overall BigQuery computing costs by 35% annually.
- Mentored a team of 3 junior data engineers, conducting code reviews and establishing CI/CD best practices using **GitHub Actions** and **Docker**.

Data Engineer

FinTech Dynamics

Toronto, ON
Aug 2019 – Dec 2022

- Developed and orchestrated 50+ ETL pipelines using **Apache Airflow** and **Python** to ingest transactional data from PostgreSQL and external APIs into an AWS S3 data lake.
- Implemented infrastructure as code using **Terraform** to provision AWS EMR clusters dynamically, scaling resources based on daily workload demands.
- Collaborated with Data Scientists to prepare feature stores and clean datasets, directly contributing to a fraud detection machine learning model that saved the company \$1.2M in its first year.

- Built automated monitoring and alerting systems integrated with Slack to proactively address pipeline failures, achieving a 99.9% uptime SLA.

PROJECTS

E-Commerce Sentiment Pipeline

github.com/ethorne-data/sentiment-pipeline

- Constructed an automated pipeline that pulls product reviews from the Amazon API, processes the text using a custom Python NLP script, and loads the structured data into Snowflake.
- Utilized Airflow for daily scheduling and Metabase to build a dashboard visualizing sentiment trends over time.

EDUCATION

Bachelor of Science in Computer Science McGill University

Montreal, QC
Sep 2015 – May 2019

CERTIFICATIONS

- **Google Cloud Professional Data Engineer** | Google (Issued: Nov 2024)
- **Snowflake SnowPro Core Certification** | Snowflake (Issued: Feb 2023)
