

Maya Patel

Vancouver, BC, Canada | (604) 555-0142 | maya.patel.dev@email.com
linkedin.com/in/maya-patel-dev | github.com/mpatel-dev

PROFESSIONAL SUMMARY

Software Engineer with 6 years of experience designing and implementing high-performance web applications, microservices, and cloud-native solutions. Proficient across the full stack with specialized expertise in JavaScript/TypeScript (Node.js, React, Vanilla JS), Python (FastAPI, Django), and REST/GraphQL API design. Strong track record of improving system uptime, reducing application load times, and driving best practices in CI/CD and automated testing.

CORE COMPETENCIES & SKILLS

Programming Languages:	JavaScript (ES6+), TypeScript, Python, SQL, HTML5/CSS3
Frontend Engineering:	React, Redux, Next.js, Vanilla JS (DOM/History API), Webpack, Tailwind CSS
Backend & APIs:	Node.js, Express, FastAPI, Django, RESTful APIs, GraphQL, WebSockets
Databases & Cloud:	PostgreSQL, MongoDB, Redis, AWS (S3, EC2, Lambda), Docker
DevOps & Tools:	Git, GitHub Actions, CI/CD, Jest, Cypress, Linux

PROFESSIONAL EXPERIENCE

Senior Software Engineer Veloce Tech

Vancouver, BC
Mar 2023 – Present

- Led full-stack architecture for a core SaaS analytics dashboard serving 50,000+ daily active users, improving frontend page rendering speed by 42%.
- Designed and implemented high-throughput microservices using **FastAPI** and **PostgreSQL**, handling 2M+ daily API requests with 99.95% uptime.
- Created modular, zero-dependency Vanilla JS UI components and reusable design primitives, cutting codebase size by 25% across 4 cross-team projects.
- Architected automated deployment pipelines using **Docker** and **GitHub Actions**, reducing deployment cycle times from 45 minutes to under 10 minutes.

Software Engineer Catalyst Interactive

Toronto, ON
Jun 2020 – Feb 2023

- Engineered full-stack features using **Node.js**, **TypeScript**, and **React** for an enterprise client collaboration platform.
- Built a real-time activity notification engine using WebSockets and **Redis Pub/Sub**, delivering under 50ms latency for live user interactions.
- Refactored legacy REST endpoints into optimized SQL queries and GraphQL schemas, decreasing overall server memory overhead by 30%.

- Collaborated with product designers and QA engineers in an Agile/Scrum team to ship features across bi-weekly sprint schedules.

PROJECTS

Modular Vanilla JS SPA Core

github.com/mpatel-dev/vanilla-spa-core

- Built a lightweight, framework-less Single Page Application engine featuring custom History API routing, pub-sub state management, and Webpack 5 configuration.

EDUCATION

Bachelor of Science in Software Engineering

Vancouver, BC

University of British Columbia (UBC)

Sep 2016 – May 2020

CERTIFICATIONS

- **AWS Certified Developer – Associate** | Amazon Web Services (Issued: Mar 2024)
